Mark,

The Trace Detection Laboratory at TSL has completed an evaluation of a consumable supply item from DSA Detection, as compared to performance of the OEM item, when tested under identical conditions. Item evaluated:

<u>DSA Part No.</u>	<u>Description</u>
DVP1883	Verification Pen for Smiths 500DT ETD System

The test results reveal no significant differences between this DSA product and the equivalent OEM product. This item is an acceptable substitute for the OEM product.

A handwritten signature in blue ink that reads "Sheldon Brunk".
