

# Instructions for Enabling Verification via Dual Mode Verification Trap

1. Login as the “Z” user profile
2. Enter Z-level Password
3. Select “Settings”
4. Select “B220 Settings”
5. Select “Advanced Options”
6. Select “Trap” (NOT Can or Dual Mode Canister!)
7. Select “Accept”

# How to Verify the QS-B220 using the Dual Mode Verification Trap

Verification of the QS-B220 using the Dual Mode Verification Trap is very similar to verification with the Verification A and B cans.

Once the Dual Mode Verification Trap method has been enabled on the QS-B220, proceed to verify the machine as you normally would. At the Verification Screen, select the “Trap” checkbox in the “Verification Type” section.

Follow the on-screen instructions to quickly and easily perform a verification.
